The brand of Cubans, fighting with General Shafter, is all right,

General Shafter weighs nearly 300 pounds. When he does come down on the Spanlards, he will come down or them heavily, you may rest assured,

If this country is compelled to keep the Philippine islands, there will b room for a good many office seekers and surely our friends from Ohio wil not be found lagging behind.

New Mexico is furnishing a good many volunteers, considering the ratio of its population to the calls for troops. New Mexico does not propose to be behind in the procession and gets there somehow or another.

Admiral Camara's fleet is still floun dering about the entrance to the Suc canal. The Mediterranean is not dangerous to Spanish men-of-war for the present and a good place to flounder

The simon pure Democratic newspapers of Kansas do not approve of the Populist-Democratic fusion ticket now in the field. So far eight of them have repudiated the combination and are lighting it. The Democratic newspapers of the Sunflower state are awakening to the fact, that fusion means all for the Pops and nothing for the Democrats.

The right kind of men seem to have hold of the affairs of the Santa Fe Fruit company. The people of this city and especially the property owners should aid this enterprise with every means in their power, as it promises to prove of great benefit and utility to this section and to this city. Public spirited and good citizens should give this company all possible support. The citizen, who subscribes for its stock, will help this city and help himself.

Hundreds of farmers who, two years ago, were strong Populists and voted and worked for Mr. Bryan's election. are found to be purchasers of bonds under the recent war loan. It is gratifying to see how the sunshine of prosperity is dispelling the gloomy clouds of Populism and flat money in this country. The farmer who buys a bond that will be paid principal and interest, in the best money the world knows, will not vote the Populist ticket hereafter. That can be depended upon.

The Silver City Independent remarks: "B. T. H. backed by the Central delegation. H. Betts will more than likely be the Republican nominee.

Mr. Betts is well known in this city and county and his many friends here hope he will be nominated and elected. He certainly has all necessary qualifications for the office named and would fill it acceptably and well.

There is a goodly lot of people in this country, hard at work trying to find something in the constitution forbidding the acquirement of new territory by the United States. The concert of European powers may not regard it as a serious matter and it nay not look very plausible, but still he question of an Anglo-American aliance is being pushed to the front by the inexorable trend of events. A sinster suggestion of German interference n the Philippines, coupled with Ausria's open and France's secret support of Spain, with the Russian bear sitting ipon his haunches in solemn and somper silence, are not necessarily signs and omens, but to the excited imaginaion of an awakened public they have a aggestive significance. ### The Hawaiian Debate.

The debate on the Hawaiian annexaion resolution in the senate is assuming a most ridiculous aspect, and the A Colfax County Candidate for the antis are furnishing the country with whole lot of amusement. For a time, at the beginning of the jaw show, the friends of the resolutions displayed some little exasperation over the delay caused by so much talk, but when a test vote determined that a majority of fall as representative for this county the senators were in favor of annexation they settled down to enjoy the bur-Yesterday, Mr. Bate. of Tennessee.

lost his temper and declared that the people had a fever and were forcing the senate into an act of madness. Mr. Tillman, the famous, was somewhat out of humor himself, and accused the majority of the senate of being up to "devilment," and said "something was rotten in Denmark." These things are amusing and also indicate that the opposition is fast nearing the end of its string. According to an understanding among the annexationists, they are not doing any talking, and that of itself is very discouraging to the few men who have undertaken to talk the resolution to

death. One of the dignified senators, a few days ago, made the assertion, in a harangue against the resolutions, that the sugar trust was responsible for the annexation sentiment in congress, and that a mighty trust was leading a republican form of government to destruction. The general supposition over the country is, and some fairly good reasons exist for that supposition, that the sugar several states, he finds a vast abundance trust is using every art known to lobbyists to defeat a measure which promises to break the hold that corporation has The Ohio campaign is progressing on the people at present in the price of

## Protection and Markets of the World.

Another of the pet theories of the free traders has been sent glimmering into exploited in the columns of newspapers the region where fallacies usually bring and the drift of public conversation, up an utter wreck, smashed beyond all there was a dim suspicion in the minds hope of repair. For years the free trade of some people that it might be a sort argument has been that in order for the United States to sell goods in the markets of the world, the home markets ant Colonel Roosevelt, and, as one must be thrown wide open to foreign competition, but a report just issued by the treasury department on exports forever silences that piece of nonsense.

According to that report the exports from this country to Japan in 1897 amounted to \$13,250,000, which is over gotten what by this time. It did not 5 per cent more than the exports in 1896 and almost three times more than those in 1895. While this vast increase in exports has been going on there has been an actual falling off in the imports from Japan. In 1897 that country shipped to the United States goods valued at \$24,000,000: in 1895 the imports
They were among the first of our troops
were \$25,500,000. It is evident therewere \$25,500,000. It is evident, therefore, that this increase is not due to any free trade legislation on the part of this be invented. It is to be noticed, also, that country. In 1895, when imports were the largest and the exports the smallest, the Wilson-Gorman bill, that paragon of Democratic legislation, was in effect. the regiment. The increase is the direct result of the ability of this country to sell certain commodities abroad cheaper than any other nation can sell them. It is purely a matter of competition, in which the manufacturers and merchants of the United States have proved themselves able to underbid those European countries which, until recently, have practically had things their own way.

The success of this country, under such circumstances and conditions, is indisputable evidence that many of the industries of the United States have arrived at a stage of development where they can command the trade of the world with a little effort put forth in ascertaining the requirements of foreign markets and filling them. Without protection such a result could never have been attained. The immense advantages of this country as a producer in certain lines are set forth by a recent ment from its agent in Japan. (St. Louis Republic.) It is gratifying to note that the president will forego the usual vacation dur-ing the heated season. His determinaion to stay by his "war room" indicates that he has no intention of letting up on the campaign work in Cuba, Porto Rico, and the Philippines.

This is right. The greater the vigor with which the war is pushed the sooner it will end, and in a short war the loss of life and property will be relatively small. From this on the war must be one of decisive aggression, even to carrving it to the shores of Spain.
